Give Your Year 1 Child the Best Start with Our Term 4 EMG Course!

If you're looking to build your child's confidence and strengthen their academic skills before upcoming school assessments, our Term 4 EMG course offers perfect support. Designed for young learners, this course provides structured, targeted learning that helps students develop a strong foundation for long-term success while keeping every lesson fun, engaging.

By introducing key concepts early and reinforcing them through guided practice, we help Year 1 students grow into confident, capable learners who feel ready for future challenges.

Why Choose the EMG Course?

- ❖ **Skill-Focused Learning:** We help students master essential skills such as reading comprehension, mathematics, and general ability. By strengthening these core areas, children build confidence and develop the academic readiness needed for the years ahead.
- ❖ **Interactive & Fun Lessons:** Our lessons include hands-on activities, creative problem-solving tasks, and engaging teaching methods that keep students interested and excited to participate.
- ❖ **Supportive Learning Environment:** We create a welcoming, encouraging space where students feel comfortable asking questions, practising new skills, and developing positive study habits. Our structured yet enjoyable approach helps children grow academically while feeling supported every step of the way. Set your child up for success and make learning a rewarding, confidence-building experience.

Year 1 EMG Course (Saturday & Friday)

Are you looking to help your child excel in Year 1 and build a strong academic foundation from the very beginning? Our EMG Course is designed to do exactly that. This program provides a rich and structured learning experience that strengthens core skills, nurtures curiosity, and prepares students for future academic challenges. By enrolling in the EMG Course, your child will gain the confidence, knowledge, and discipline needed to thrive throughout their schooling journey!

What to expect:

-  **A challenging and stimulating curriculum:** Students will engage with advanced modules across English, Mathematics, and General Ability. These lessons go beyond the standard Year 1 level, encouraging deeper thinking and helping students develop strong study habits early on. Families should expect to dedicate consistent weekly time to support learning and revision.
-  **A valuable head start:** The course is designed to place students ahead of the curve. By mastering key concepts early, children feel more confident in class, adapt quickly to new topics, and develop a positive attitude toward learning.
-  **English: Strengthening language foundations:** Students develop strong reading comprehension skills through a range of age-appropriate texts. They practise identifying key information, inferring meaning, and building vocabulary, all essential for both classroom learning and formal assessments.
-  **Mathematics: Deepening understanding of core concepts:** The numeracy component reinforces foundational maths concepts, including number operations, basic measurement, and early data skills, in a way that builds genuine understanding. Students develop the confidence to approach maths problems methodically, check their work, and explain their reasoning.
-  **General Ability: Boosting reasoning and problem-solving skills:** This module sharpens the reasoning and thinking skills that underpin success across all subject areas. Through pattern recognition, logical sequences, spatial reasoning, and word problems, students strengthen their ability to think flexibly, work through unfamiliar challenges, and approach problems from multiple angles.
