Spring Holiday 5 Days Intensive Course

"Developing the Critical Skills required for Higher Learning"

The fundamental logic behind these Spring Holiday Workshops is to provide students with opportunities to develop and enhance the integral skills required for success in Highschool. The workshops will also allow students to clear any doubts from previous term topics and get ahead for the upcoming terms in school.

Stage 4 English & Writing Skills (28th Sep – 2nd Oct)

In this 5-day course on textual analysis, students begin with an exploration of prose fiction, learning active reading strategies and delving into the TEE structure (technique, example, effect) for effective textual analysis. They'll engage in hands-on activities, like visualizing imagery from quotes and deducing deeper meanings. The course then shifts to poetry, emphasizing both figurative language and structural elements, before moving into analysis of drama and film to expose them to various forms of texts. Literary and other techniques are meticulously broken down, with a special focus on common writing mistakes and best practices for integrating textual evidence. From there, students are introduced to essay writing, learning how to use their analysis meaningfully to answer questions on a text.

Stage 4 Intensive Mathematics (28th Sep – 2nd Oct)

This start early, master early program is designed to enable elite students to master the advanced mathematics curriculum within a concise two-year timeframe. This Spring Holiday course is intended for those who have missed or struggled with our Term 1, 2, and 3 courses to catch up to the existing fast-paced program. As the Elite Maths course will be getting harder in the future, this will be your last chance to catch up before starting Term 4. The topics being covered include; Rates and Ratios, Linear Relationships, Coordinate Geometry, Simultaneous Equations, Indices and Surds.

SINCE 1992

What's On
