SINCE 1992

Spring Holiday 5 Days Intensive Course

"Developing the Critical Skills required for Higher Learning"

The fundamental logic behind these Spring Holiday Workshops is to provide students with opportunities to develop and enhance the integral skills required for success in Highschool. The workshops will also allow students to clear any doubts from previous term topics and get ahead for the upcoming terms in school.

Stage 5 Intensive Mathematics (28th Sep – 2nd Oct)

This Mathematics Masterclass is designed to strengthen students' mathematical proficiency, confidence and problem-solving efficiency, with a particular focus on developing greater accuracy, fluency and speed under examination conditions. Through a structured revision of key concepts, students will consolidate their understanding, address gaps in foundational knowledge, and develop a more comprehensive understanding of the connections between different mathematical topics. The program will cover: Probability I & II, Financial Maths, Statistics I & II, Trigonometry, Further Trigonometry I & II, and Logarithms I & II.

Stage 5 English & Writing Skills (28th Sep – 2nd Oct)

This intensive English & Writing Skills Workshop is designed to strengthen students' creative and analytical writing skills through a focused study of narrative structure, plot development, characterisation and thematic development. Students will explore how these key elements work together to construct effective and engaging narratives, while developing greater control over language, structure and expression. Through guided instruction and targeted writing practice, students will build confidence in developing and communicating ideas with greater clarity, sophistication and purpose. The workshop provides a strong foundation for future school assessments, examinations and advanced English studies.

What's On
