Term 1 EMG course for 2027 will commence on Saturday, 23 January!

Year 1 Term 1 (2027) course has been carefully designed to ensure students meet the high academic standards expected at this stage of the school year.

By attending our course, students will strengthen their foundational skills, build confidence in their learning, and gain an academic advantage by getting ahead of their peers.

Students will be introduced to a **new General Ability (G.A.) module**, designed to develop verbal and non-verbal reasoning skills. The course will also focus on reading, language conventions, and numeracy, helping students prepare for future assessments such as NAPLAN and OC exams.

A new Friday EMG class will be available from Term 1. Please refer to the updated EMG course timetable below for further details.

Why Choose the EMG Course?

- **Build Essential Skills:** Strengthen reading, mathematics, and general ability skills while building confidence and academic readiness.
- **Engaging Lessons:** Interactive activities and problem-solving tasks make learning enjoyable and rewarding.
- **Supportive Environment:** A structured classroom where students feel encouraged to learn, grow, and develop positive study habits.

Year 1 EMG Course (Saturday & Friday)

Looking to give your child a strong academic advantage from the very beginning of their schooling journey? Our Year 1 EMG Course is thoughtfully designed to build confidence, strengthen foundational skills, and foster a genuine love of learning.

Through a structured, engaging, and enriching curriculum, students are introduced to advanced concepts in English, Maths, and General Ability that extend beyond the standard Year 1 classroom program.

The course encourages students to develop strong study habits, critical thinking skills, and problem-solving abilities from an early age, helping them become more independent and capable learners. By participating in challenging yet age-appropriate lessons, students gain the confidence to tackle new concepts, embrace academic challenges, and strive for excellence across all subject areas.

- ☑ **A Challenging and Enriching Curriculum:** Students participate in advanced learning across English, Mathematics, and General Ability. Lessons extend beyond the standard Year 1 curriculum, encouraging higher-order thinking, strong problem-solving skills, and positive study habits from an early age.
- ☑ **A Valuable Academic Head Start:** By introducing key concepts earlier and in greater depth, the course helps students stay ahead of their peers. This early exposure builds confidence, allows children to grasp new classroom content more easily, and fosters a positive attitude towards learning and achievement.
- ☑ **English:** Students strengthen their reading comprehension through engaging, age-appropriate texts. They learn to identify key information, infer meaning, and expand their vocabulary.
- ☑ **Mathematics:** Our maths program focuses on establishing a strong foundation in numeracy. Students explore number operations, measurement, and early data concepts while learning to approach problems with confidence and accuracy.
- ☑ **General Ability:** This component develops essential critical thinking and reasoning skills through activities involving pattern recognition, logical reasoning, spatial awareness, and problem-solving.
