Year 5 WEMT Course

The Year 5 WEMT course is being updated to include new module contents. This will require students to commit to a significant amount of weekly module work, but it will help them build a solid foundation for the NAPLAN and selective school exam. The writing module will teach students how to organise their writing in the most efficient way possible, with a focus on developing critical thinking and reasoning skills. The English module will focus on reading skills, practicing reading comprehension and multiple-choice questions. The mathematics module is essential for students to thoroughly understand mathematical theories, principles, and formulas to solve problems. The thinking skills module will cover a variety of practical, challenging, and mind-stimulating questions in problem solving and critical thinking skills. Students can choose one of the following WEMT courses according to their needs:
